

For Elastomeric Bearing Pad Details of Shapes A1 & B1, see Std. Dwg. BBP-003.

**SHOWING PADS FOR BEAM TYPES B27-B42 & CB27-CB42**

Use 1/2" x 1'-6" preformed cork for beam types B12-B21 & CB12-CB21 for bearing. Include cost of bearing pads in price per beam.

**GENERAL NOTES**

Provide metal shims conforming to ASTM A36 and galvanized in accordance with ASTM A123. As alternates, cork, polymer, or elastomer shims may be used. Include the cost of furnishing and placing these shims in the price per beam.
